CLASSROOM TECHNOLOGY

iPad Usage & Operating Guidelines

Care, safety & learning expectations for every student, every day.

Classroom iPad Usage Agreement & Operating Guidelines

1. Overview & Primary Usage Policy

iPads deployed to the classroom are intended **exclusively for specialized applications** that cannot be accessed or run on district-issued Chromebooks.

Students **must use Chromebooks for all general web browsing**, research, and standard online activities. Chromebooks maintain dedicated web-filtering and monitoring protocols designed specifically to ensure student safety, compliance with district policy, and adherence to legal requirements.

2. Device Security & Inventory Management

- Classroom iPad sets consist of designated devices labeled and numbered sequentially (e.g., WMS-IP-210-1 through WMS-IP-210-30).
- Each student must be assigned a specific numbered device for the term/hour/class. Teachers are responsible for auditing all units at the end of each period.
- All iPads must be securely locked and charging overnight in designated charging carts or iPad garages.

3. Monitoring & Support Protocols

- Teachers are requested to instruct students on appropriate device handling and actively monitor usage during class periods.

For technical support, troubleshooting, or app request, please submit a standard work order to the Technology Department.
